

# MIKE

## PENDANT CONTROL STATION

Mike is a pendant control station used for the control of industrial machines. This auxiliary control acts on the motor of the machine through a power interface, such as a contactor or a PLC. It is an industrial control station designed for heavy duty use.

### DESIGN

Mike has an innovative design, where each graphic element is linked to a specific technical function. Its dimensions and shape are the result of careful analysis of the product ergonomic aspects, aimed at achieving a graphic style that blends in with modern industrial environments, making Mike extremely handy and user friendly. Its compact dimensions and antislip grooves on the case make it easy to handle under any working conditions.

### FEATURES

The innovative hanging system of Mike, with cables hidden inside the shell, enables quick, correct, ergonomic installation to prevent the danger of personal injury in everyday use. Mike has been designed to facilitate wiring and maintenance: the switches are installed in the base of the control station, together with the inlet of the cable, and are separated from the actuators, installed on the cover; this drastically reduces time and costs for installation and maintenance down time. The emergency stop mushroom pushbutton complies with ISO 13850 regulation and is equipped with positive opening NC switches.

### OPTIONS

Mike is available in configurations with 4 to 15 actuators, with 1NO or 1NC switches, LEDs voltage 24/48 V AC/DC or 110/230 V AC, and potentiometers.

The range includes actuators in various colours: one or two speed buttons, selector switches and key-operated switches in various actuation configurations, pilot lights, pulsed or latched mushroom pushbuttons with rotation or key-operated release. One-speed pushbuttons and selector switches are available in illuminated version in a range of colours.

Mike comes with standard sheet of labels (symbols and lettering) to be applied to the upper cover near the actuators, according to customers' needs. Upon request Mike can be supplied with pushbuttons bearing two-colour moulded symbols, making the symbols permanent.

A specific protection is available for the actuators installed on the bottom of the control station.

### MATERIALS

The 22.5 mm rubber pushbuttons ensure protection against dust penetration, to prevent them from becoming stuck when the control station is used in particularly harsh conditions.

All the materials and components used are weather resistant and guarantee protection of the unit against the penetration of water and dust.

## STANDARDS - MARKINGS - HOMOLOGATIONS

- Conformity to Community Directives:
  - 2006/95/CE: Low Voltage Directive
  - 2006/42/CE: Machinery Directive
- Conformity to Standards:
  - EN 60204-1 Safety of machinery - Electrical equipment of machines
  - EN 60947-1 Low-voltage switchgear and controlgear
  - EN 60947-5-1 Low-voltage switchgear and controlgear - Control circuit devices and switching elements - Electromechanical control circuit devices

- EN 60947-5-5 Low-voltage switchgear and controlgear - Control circuit devices and switching elements - Electrical emergency stop device with mechanical latching function
- EN 60529 Degrees of protection provided by enclosures
- ISO13850 Safety of machinery - Emergency stop - Principles for design
- Regulations for the prevention of accidents BGV C 1 (only for Germany)
- CSA-C22.2 No 14-13 - Industrial Control Equipment
- UL 508 - Industrial Control Equipment

## GENERAL TECHNICAL SPECIFICATIONS

- Storage ambient temperature: -40°C/+80°C
- Operational ambient temperature: -40°C/+80°C
- Protection degree: IP 66 / IP 67 / IP 69K
- Insulation category: Class II
- Cable entry: rubber cable sleeve (Ø 8+26 mm)
- Operating positions: any position
- Mechanical life:
  - 1 speed pushbutton: 10x10<sup>6</sup> operations
  - 2 speed pushbutton: 10x10<sup>6</sup> operations
  - illuminated pushbutton: 10x10<sup>6</sup> operations
- HALT test (data available on request)
- Markings and homologations: CE eULus EAC SIL 1
- UL Environmental Rating: (Mike black) Type 1, 4 and 4X  
(Mike yellow) Type 1, 4 and 4X indoor use only

## TECHNICAL SPECIFICATIONS OF THE MICROSWITCHES

- Utilisation category: AC 15
- Rated operational current: 3 A
- Rated operational voltage: 250 Vac
- Rated thermal current: 10 A
- Rated insulation voltage: 300 Vac
- Mechanical life: 10x10<sup>6</sup> operations
- Terminal referencing: according to EN 50013
- Connections: screw-type terminals
- Wires: 2x0,5mm<sup>2</sup> - 2x1,5 mm<sup>2</sup> - 1x2,5 mm<sup>2</sup>
- Tightening torque: 0.5 Nm
- Markings and homologations: CE eULus

The slow action switch PRSL1800PI has 1 NO contact, double break.  
The slow action switch PRSL1801PI has 1 NC, double break.  
All NC contacts are of the positive opening operation type .  
The switches have the following reference for internal wiring.

PRSL1800PI

PRSL1801PI

## TECHNICAL SPECIFICATIONS OF THE LEDS

- Electrical ratings PRSL1821PI: 110-240 Vac, 1.15-2.50 mA
- Electrical ratings PRSL1820PI: 24-48 Vac/dc, 1.30-2.70 mA
- Markings and homologations: CE eULus

PRSL1820PI / PRSL1821PI

## POSSIBLE ASSEMBLIES AND OVERALL DIMENSIONS (MM)

## 1 MIKE - Legend - Control elements

### \* SWITCH ACTIVATION

It is possible to mount up to 3 switches for each control element. The chart on the right of each pushbutton or selector switch specifies which position activates the switch on the top, in the middle or on the bottom. If the selector switches are mounted with the lever facing downwards, then the activation of the switches is reversed. Eg.: 2 speed pushbutton: the first speed activates the switches on the top and in the middle, while the second speed activates the switch on the bottom.

### Pushbuttons

It is possible to mount up to three switches for each button. LEDs can be mounted only in the middle.

		SWITCH ACTIVATION*		
1	1 speed pushbutton with disk	<input type="checkbox"/>	speed 1	
25	1 speed black pushbutton	<input type="checkbox"/>	speed 1	
26	1 speed grey pushbutton	<input type="checkbox"/>	speed 1	
2	2 speed pushbutton with disks	<input type="checkbox"/>	speed 1	
27	2 speed black pushbutton	<input type="checkbox"/>	speed 1	
28	2 speed grey pushbutton	<input type="checkbox"/>	speed 2	
3	1 speed illuminated pushbutton with disk	<input type="checkbox"/>	speed 1	
		<input type="checkbox"/>	LED	
		<input type="checkbox"/>	speed 1	

### Mushroom pushbuttons

All mushroom pushbuttons activate all the switches at the same time.

- 4 Latched mushroom pushbutton for emergency stop
- 5 Latched mushroom pushbutton for emergency stop Ø 40 mm
- 6 Key mushroom pushbutton
- 7 Impulse mushroom pushbutton with black base

### 11 Pilot light

### 12 Blanking plug

### Toggle selector switches

It is possible to mount only two switches for each selector. In the middle it is possible to mount only the LED for illuminated selector switches.

## USE AND MAINTENANCE INSTRUCTIONS

Mike Pendant Control Station is an electromechanical device for low voltage control circuits (EN 60947-1, EN 60947-5-1) to be used as electrical equipment on machines (EN 60204-1) in compliance with the fundamental requirements of the Low Voltage Directive 2006/95/CE and of the Machine Directive 2006/42/CE.

The pendant station is designed for industrial use and also for use under particularly severe climatic conditions (operational temperature from -40°C to +80°C, suitable for use in tropical environment).

The equipment is not suitable for use in environments with potentially explosive atmosphere, corrosive agents or a high percentage of sodium chloride (saline fog). Oils, acids or solvents may damage the equipment; avoid using them for cleaning.

Do not connect more than one phase to each switch. Do not oil or grease the control elements or the switches.

The installation of the pendant station shall be carried out by expert and trained personnel. Wiring shall be properly done according to the current instructions.

Prior to the installation and the maintenance of the pendant station, the main power of the machinery shall be turned off.

### Steps for the proper installation of the pendant station

1. Open the pendant station
2. Screw the variable section rubber cable sleeve (6) into the enclosure (14)
3. Cut the cable sleeve (6) and insert the multi-pole cable tight enough to guarantee protection against water and/or dust
4. Strip the cable to a length suitable for wiring the switches/LED (10)
5. Tape the stripped part of the cable
6. Fix the multi-pole cable inside the pendant station using the variable section cable clamp (9) (supplied together with the fixing screws (8), inside the "Accessories bag")
7. Tighten the cable tie (15) (inside the "Accessories bag") under the chosen measure ring on the cable sleeve (6)
8. Connect all the switches/LED (10) according to the wiring layout printed on the switches /LED and overleaf (tighten the wires into the terminals with a torque equal to 0.5 Nm; (UL (c)UL: use 60°C or 75°C copper (CU) conductors and stiff or flexible wire 14-16 AWG); insertability of wires into the terminals 2x0.5mm<sup>2</sup> 2x1.5 mm<sup>2</sup> 1x2.5 mm<sup>2</sup>)
9. Close the pendant station checking the proper positioning of the tightening gasket (13), making sure the gasket fits well into the cover and the enclosure seats. ATTENTION: make sure no cable is in between the switches/LED (10) and the actuators (16) mounted on the upper cover (11). Fix the closing clips (12), if provided and depending on the assembly. Tighten the fixing screws (3) on the cover with a torque of 250 cNm.
10. Screw the clamping plates (4, 5) into their seat on the enclosure (14)
11. Fasten the holding wires, used to support the multi-pole cable, to the clamping plates (4, 5). ATTENTION: make sure the holding wires are as close as possible to the screw. After positioning the holding wires, tighten the screw
12. Position the wire cover (2) and tighten the screw (1) with a torque of 250 cNm. Insert the hook (7) into its seats on the enclosure (14)
13. In order to open the control station, loosen the screws on the cover (3), remove the clips (12), if provided, loosen the screw (1) and remove the wire cover (2), and loosen the clamping plate (4)

CAUTION: Do not operate on the actuators when the control station is not perfectly closed (with screws tightened and clips fitted as described in point 9) as this may cause the release of the mechanical interlock. If this happens, re-position the mechanical interlock before closing the control station.

### Periodic maintenance steps

- Check the proper tightening of the screws (3) of the enclosure (11, 14)
- Check the proper tightening of the switch/LED (10) terminal screws
- Check the wiring conditions (in particular where wires clamp into the switches)
- Check the conditions of the tightening gasket (13), of the rubber of the actuators (16) and of the cable sleeve (6)
- Check that the plastic enclosure (11, 14) of the pendant station is not broken
- Check the proper assembling of the clips (12), if provided

In case any component of the pendant station is modified, the validity of the markings and the guarantee on the equipment are annulled. Should any component need replacement, use original spare parts only.

TER declines all responsibility for damages caused by the improper use or installation of the equipment.

## Specifications UL

### Technical Specifications UL

Code Mike certified UL = F80XXXXXXXXXXXXX  
Category = NKCR / NKCR7  
Contact Blocks Rating = A600, Q600  
LED PRSL1821PI Rating = 110 – 240VAC, 1.15 – 2.50 mA  
LED PRSL1820PI Rating = 24 – 48 VDC/AC, 1.30 – 2.70 mA  
Environmental Rating (Mike black) = Type 1, 4 and 4X  
Environmental Rating (Mike yellow) = Type 1, 4 and 4X indoor use only  
Cord diameter range = from 0.31 in (8mm) to 0.91 in (23mm)  
Cord type = flexible, type minimum SW or SJW (ZJCZ/7)  
Wire size range = 14-16 AWG stranded or solid  
Conductors = Copper (CU) 60/75°C  
Terminal tightening torque = 4.50 lb.in (0.5Nm)  
Marking = 

### Protection PRSL1830PI, PRSL1831PI

When the pilot light / selector switch / key selector switch / impulse mushroom pushbutton / mushroom push-button / emergency mushroom push-button / emergency key mushroom push-button / actuator is mounted on the bottom of the enclosed pendant control stations, the large protection PRSL1831PI or small protection PRSL1830PI shall be used.

### Emergency Stop Button

Category = NISD3  
Code = PRSL1880P1, PRSL1881PI  
Contact Blocks = PRSL1801PI (A600, Q600)  
Optional Contact Blocks = PRSL1800PI (A600, Q600)

Code = PRSL1890PI  
Contact Blocks = PRSL1801PI (A600, Q600)

These unlisted components "emergency stop buttons" are intended for use within  
TECNO ELETTRICA RAVASI S R L Listed (NKCR) Mike and Victor pushbutton stations.

### SWITCH ACTIVATION

The data and the products illustrated in this brochure may be modified without notice. Under no circumstances can their description have a contractual value.
